University of Technology and Applied Sciences

💼 WORK EXPERIENCE

Vodafone, Application Engineer

August 2025

- Full-stack internal platform (React 19, FastAPI, PostgreSQL 16) serving 4 business teams
- Delivered 5+ releases: billing reports, SME porting, provisioning reconciliation, and RBAC
- Replaced n8n webhooks with direct API integration, cutting response time and removing failure points
- RBAC system replacing 30 boolean columns, zero schema changes required
- Fixed Apache Doris OOM errors on 5M+ record queries, eliminating production 500s
- Automated recovery of 386 failed payments at 99.5% success rate
- Deployed across 3 Kubernetes/Podman clusters with CI/CD

Vodafone, Intern - IT & Data Automation Engineer

February 2025 – present | Muscat, Oman

- Built Slack/Jira bots reducing manual ops by ~40%
- Migrated frontend to React.js and introduced Python analytics across 2 departments
- Coordinated across Finance, IT, and Cybersecurity teams.

Web Developer, Freelance

March 2023 – present

- Built 3+ React.js client apps with full CRUD and responsive design
- Improved performance and fixed UI/UX issues across multiple codebases
